

Tire Recycling Equipment Solutions For Profit and Planet

CM Zero Waste Systems

Maximize Your Profits & Eliminate Waste

Today the most sophisticated recyclers strive to recover all of the tire components and are developing new markets to become more efficient. By eliminating waste and creating expanded opportunities from these materials, processors can maximize their profits by offering a variety of wire free crumb rubber feedstock sizes and clean salable steel for resale.

The Zero Waste System includes a CM Liberator and Steel Reclaim System. The Liberator will process 4-6 inch shred producing a variety of rubber sizes. Depending on capacity, a CM2R or CM4R Liberator can be used.

Benefits Include:

- Additional revenue generation
- Elimination of waste
- Clean salable steel, less than 5% contaminate
- Multiple market opportunities for rubber TDF, mulch, playground and crumb rubber
- Two system options available

Process pre-shredded material

Or clean up your waste

Rejected TDF with high steel content

Comingled rubber and steel

Producing wire free crumb and clean steel
